

Harbor Identity Modernization - Steering Committee Pack

Project: HARBOR **Domain:** Cybersecurity

Business goal: Modernize enterprise identity, provisioning and access governance.

Executive Summary

The project remains focused on preserving the intended business outcome while keeping architecture, delivery risk, client expectations, and cross-project dependencies explicit. This pack is synthetic and designed for project-memory ingestion.

Top Risks

Risk	Owner	Status
legacy provisioning gaps	Ava White	Open
role mapping ambiguity	Ethan Lee	Mitigating
Atlas timing pressure	Elena Patel	Watching
privileged-access control change	Ishaan Joshi	Open
directory cleanup	Adrian Pillai	Mitigating

Architecture and Decision Summary

Enterprise Directory: Identity source

Provisioning Layer: SCIM and legacy adapters

Policy Engine: RBAC and exceptions

SSO Gateway: Application access and Atlas bridge

Decision Principles

- Applications migrate in waves
- RBAC is baseline with governed exceptions
- Legacy non-SCIM applications may remain outside phase 1

Leadership Ask

Preserve historical rationale, track cross-project dependencies explicitly, and route material scope or architecture changes through proper governance.
