

Pulse Store Operations Intelligence - Steering Committee Pack

Project: PULSE **Domain:** Retail Operations

Business goal: Create a unified operational intelligence and alerting layer for regional stores.

Executive Summary

The project remains focused on preserving the intended business outcome while keeping architecture, delivery risk, client expectations, and cross-project dependencies explicit. This pack is synthetic and designed for project-memory ingestion.

Top Risks

Risk	Owner	Status
missing telemetry	Samir Mehta	Open
high false positives	Victor Scott	Mitigating
regional KPI conflicts	Claire Moore	Watching
platform capacity contention	Ben Fernandez	Open
store adoption resistance	Grace Williams	Mitigating

Architecture and Decision Summary

Store Systems: Telemetry and operations events

Shared Data Platform: 15-minute analytical processing

Rules Engine: Enterprise KPI thresholds

Ops Console: Regional alerts and investigation

Decision Principles

- 15-minute analytical latency is accepted
- Enterprise KPI definitions override regional legacy definitions
- Midwest is first production pilot

Leadership Ask

Preserve historical rationale, track cross-project dependencies explicitly, and route material scope or architecture changes through proper governance.
